

# ÆGIS ENVIRONMENTS MATERIAL SAFETY DATA SHEET

## ÆGIS Microbe Shield™ Program — ÆGIS™ Antimicrobial (Typical Applied Material)

**Note:** This Material Safety Data Sheet has been prepared to provide information on the typical material remaining on a surface which has been treated with ÆGIS Antimicrobial. Antimicrobial is only sold as a concentrate in solvent. For application, ÆGIS Antimicrobial is diluted with water. The hydrolyzed material in the dilute solution then covalently or ionically bonds with the target surface and covalently bonds with itself to form a durable copolymer. Any CAS Numbers shown below are for the "as supplied" form of the antimicrobial. No CAS Numbers have been assigned for the intermediate hydrolyzed form or the resulting copolymer, neither of which are articles of commerce.
